PROJECTS

University Student Portal Dashboard

- Designed and developed a web-based dashboard for student academic management using HTML, CSS, and JavaScript
- Implemented core features such as subject tracking, registration system, academic checklist, and schedule viewer
- Focused on clean, user-friendly UI/UX for seamless navigation and student engagement
- Collaborated with a team to structure backend functionality (if applicable: e.g., using Node.js or PHP) and integrate with student data
- Ensured responsive layout and component-based design principles

CERTIFICATIONS

- Introduction to Packet Tracer Exam
 - Computer Hardware Basics
-
